
Polaris

by Lumanexus

An AI co-pilot for every teacher — and a personal tutor for every student.

CBSE & Karnataka State Board · English · Hindi · Kannada · aligned to your school's mission

THE PROBLEM

Great teachers, stretched too thin

1

Hours lost

Lesson plans, worksheets, question papers — built by hand, every week.

2

Board-exam pressure

SSLC and board results ride on each student, with little time to give personal help.

3

Disconnected tools

Content, assessment, tutoring and parent updates all live in different places.

ONE PLATFORM

One platform, aligned to your mission

Teachers, leadership and parents work in one place — around the same view of the student, all pulling toward your school's mission, vision and values.

For Teachers

Ready-to-teach content in minutes

For Leadership

See the whole school & its KPIs

For Parents

Clear progress, in their language

A chapter's teaching, ready in minutes

Pick any CBSE or Karnataka chapter — Polaris builds the whole kit, grounded in the official textbook and accuracy-checked before use.

Lesson plan

Worksheet + answers

Question bank & quiz

Revision notes

Flash cards

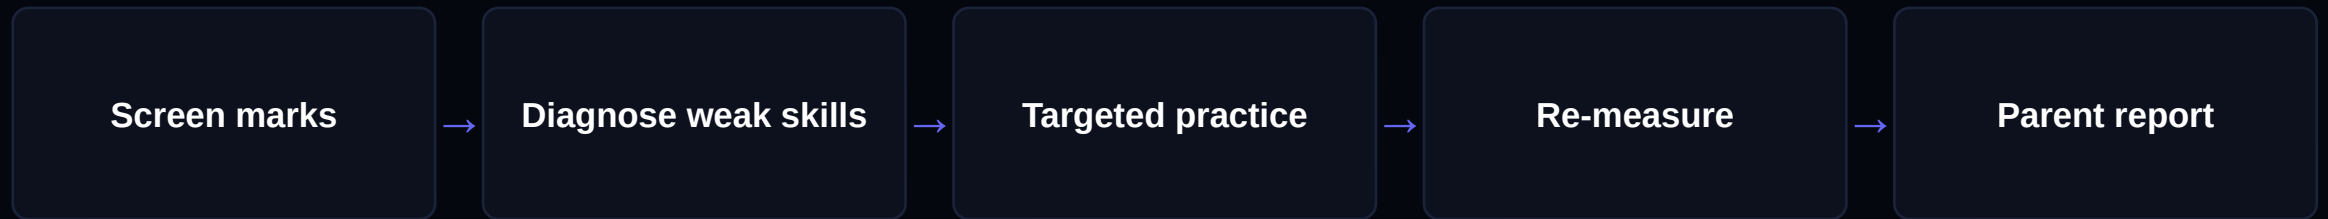

Mind map

Formula sheet

**Aurora concept video &
3D**

Grounded in official textbooks · accuracy-gated · tagged to your mission

Every student improves — measurably

Sample outcome: **48** → **63 (+15)** over two cycles

Grade 10 marking follows the official KSEEB blueprint. More boards on the roadmap.

A safe AI tutor for every student

Multilingual

Answers in English, Hindi or Kannada

Adaptive

Adjusts to how each learner is doing

Reads handwriting

Understands photographed written work

Safe by design

Child-safety guardrails on every path

Everyone stays in sync

For Leadership

- Syllabus coverage across classes
- Student progress & early-warning signals
- Teaching activity at a glance
- Are we living our mission?

For Parents

- Clear, parent-ready progress reports
- In the family's language
- A shared view of their child
- Collaboration, not scattered messages

Built for trust, safety, and India

Grounded

Content follows the official CBSE / KSEEB textbooks — not a foreign curriculum.

Accuracy-checked

Subject-expert and maths checks run before anything reaches a classroom.

Safe & private

Child-safety guardrails, and each school's data kept separate and private.

A technology company, built on rigor

Polaris is our first product. We build deterministic, domain-specialized AI copilots for high-stakes work.

On the roadmap: more boards and regions (incl. the GCC & Arab world) · analytics · AI copilots for other domains such as civil engineering.
